311 GIS Helps Goldsboro, NC Manage Citizen's Concerns.

311GIS is an easy-to-use online solution for citizen issue reporting. Goldsboro, NC is now using 311GIS for web, Android and iOS. 311GIS is an easy-to-use Esri-based interface that allows the public to submit request in a variety of categories, including Public Works and Code Enforcement. It offers a large map for easily viewing, and provides users with ability to follow other submitted requests. Additionally, users can add comments and pictures to any request.

“GTG is excited to implement 311GIS in Goldsboro,” said Andrew Radford, GIS Solutions provider at GTG. “311GIS will help the City to continue promoting a faster and more effective workflow for their citizens. With the ability to map a wide variety of information in a single, easy-to-use public Web portal, 311GIS will get citizens involved and excited about what is happening in their community.”

311GIS gives citizens access to important and relevant information. 311GIS is free to the public. Goldsboro citizens can experience 311GIS by clicking the following link: 311gis.com or by downloading the application from the Android Play Store or from iTunes.
